

## REMARKS/ARGUMENTS

The amendments to the specification were made to update the cross-reference to related applications, to correct clear typographical errors, to update deposit information, and to place the application in conformance with 37 CFR § 1.77(c) by removing bolding and underlining from the section headings and underlining from the specification. Subject matter being added to the specific sections of the specification is represented by underlining, while material deleted is represented by strikeout. No new matter is added by these amendments.

The claims have been amended to remove non-elected subject matter previously allowed in the parent application and to add claims drawn to other embodiments of the invention. Support for the added claims is found in the original specification as filed and specifically on page 1, line 17; page 9, lines 26-28; page 10, line 3; page 14, lines 17-20; page 15, line 24 through page 17, line 27; and page 16, lines 20-22.

The paper copy of the sequence listing has also been revised by numbering the pages consecutively starting from page 1 pursuant to 37 CFR § 1.821(c).

Attached hereto is a complete copy of the specification and claims and is captioned "Version with Markings to Show Changes Made".
